

# 2011 HELLEBORE OFFERINGS

(also known as Christmas Rose  
and Lenten Rose)

Hellebores are hardy to Zone 4 (we are Zone 5), are drought tolerant and grow in soil loosened with compost at a PH of 5.5 - 6.5 and prefers to grow in shade or partial shade.

Bicolour	\$12.95 each
Sunny Yellow	"
Dark Wine	"
Winter White	"
Pretty Pink	"
Rhubarb and Custard	"
Picotte	"
Double Pink	\$15.95 each

When planting in your garden, don't plant too deep or shallow. Keep the crown of the plant just below the soil line. Hellebores require a well-drained site so, planting on a slope is good. If you don't have a hillside or sloping land, build a berm (soil mounded that is several inches higher than the surrounding area).
